

Login to the CDA/Citrix environment

User Manual for the login
via an external network device

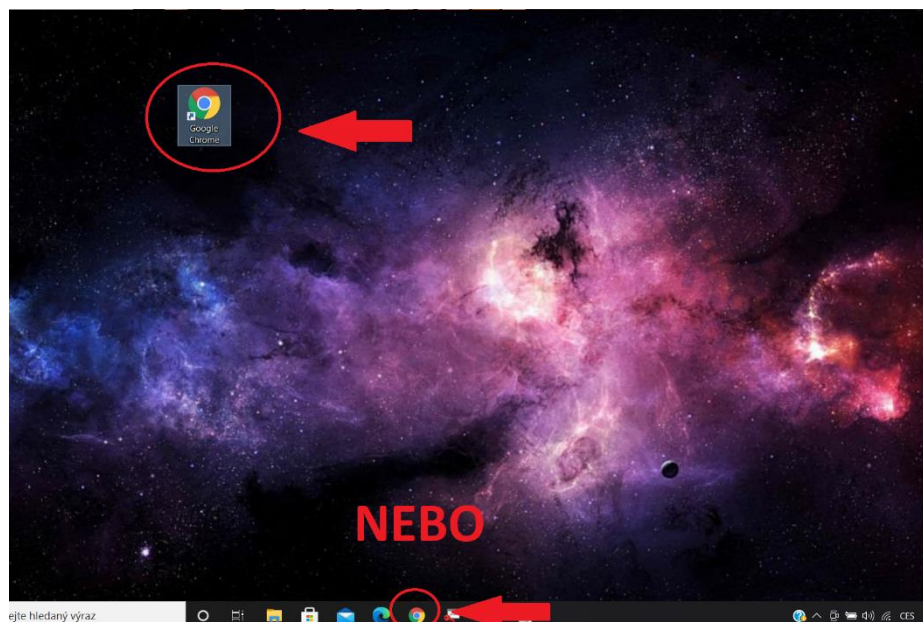

Additional Information on the New Environment

IMPORTANT NOTICE!

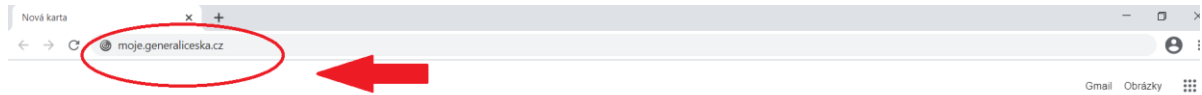

- DO NOT run the new portal in a CDA environment.
- The login via OTP has undergone a minor change, your **CHALLENGE code** is not automatically copied to the clipboard, it needs to be overwritten manually. Your generated **OTP code** is still automatically copied to the clipboard, and you can use the **CTRL+V** shortcut to enter it into the portal.
- **CAUTION!** Use the **Chrome** browser to access the new portal / Apple users, use the **Safari** browser. Other browsers may be used as well, but they are not fully supported.
- Restrictions are applied for **copying data between the CDA and local device** per established company policies and rules.
- **The new CDA portal no longer includes the files and documents to print features.** If the old CDA server did not feature its appropriate driver for a private printer, and the Citrix Universal Printer driver was not sufficient either, the users could use the documents to print feature. This functionality is no longer enabled on the new server for security reasons. The HP and RICOH print drivers are currently available on the new portal. This offer for private printers will be further expanded.

External network device login procedure

Using your **Chrome** (Safari for Apple users), enter the address **moje.generaliceska.cz**

Enter the address **moje.generaliceska.cz**

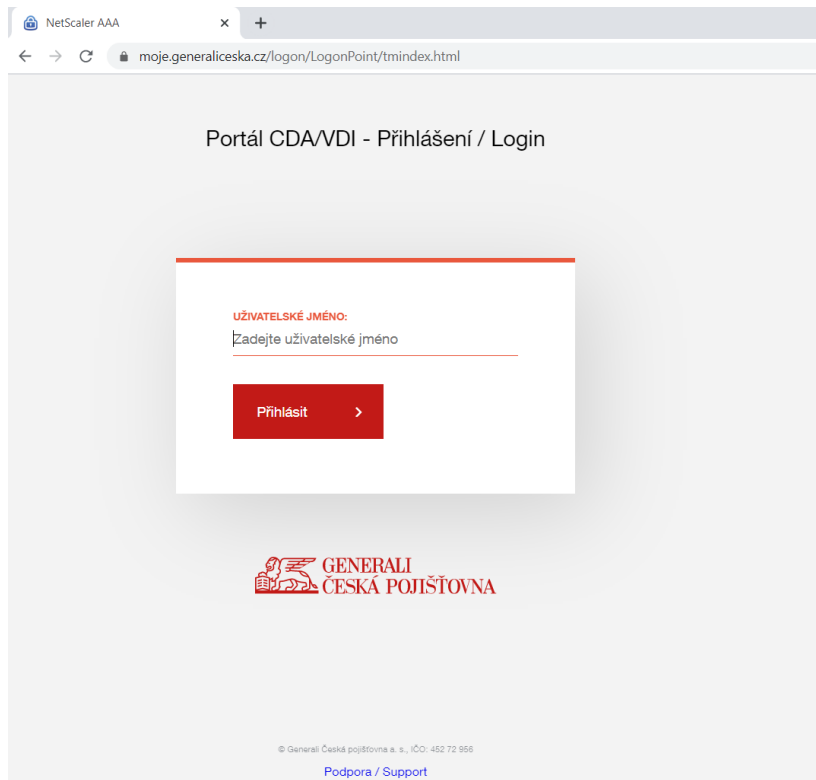

Google

Hledejte na Googlu nebo zadejte adresu URL

Personalizovat

Enter your user name

New users are prompted to change their OneTimePass PIN the first time they log in.

When logging in for the first time, you must enter the PIN in the OneTimePass, which is listed together with the activation code in an email sent from the Helpdesk.

Enter **CHALLENGE code**. CAUTION, the code must be overwritten manually.

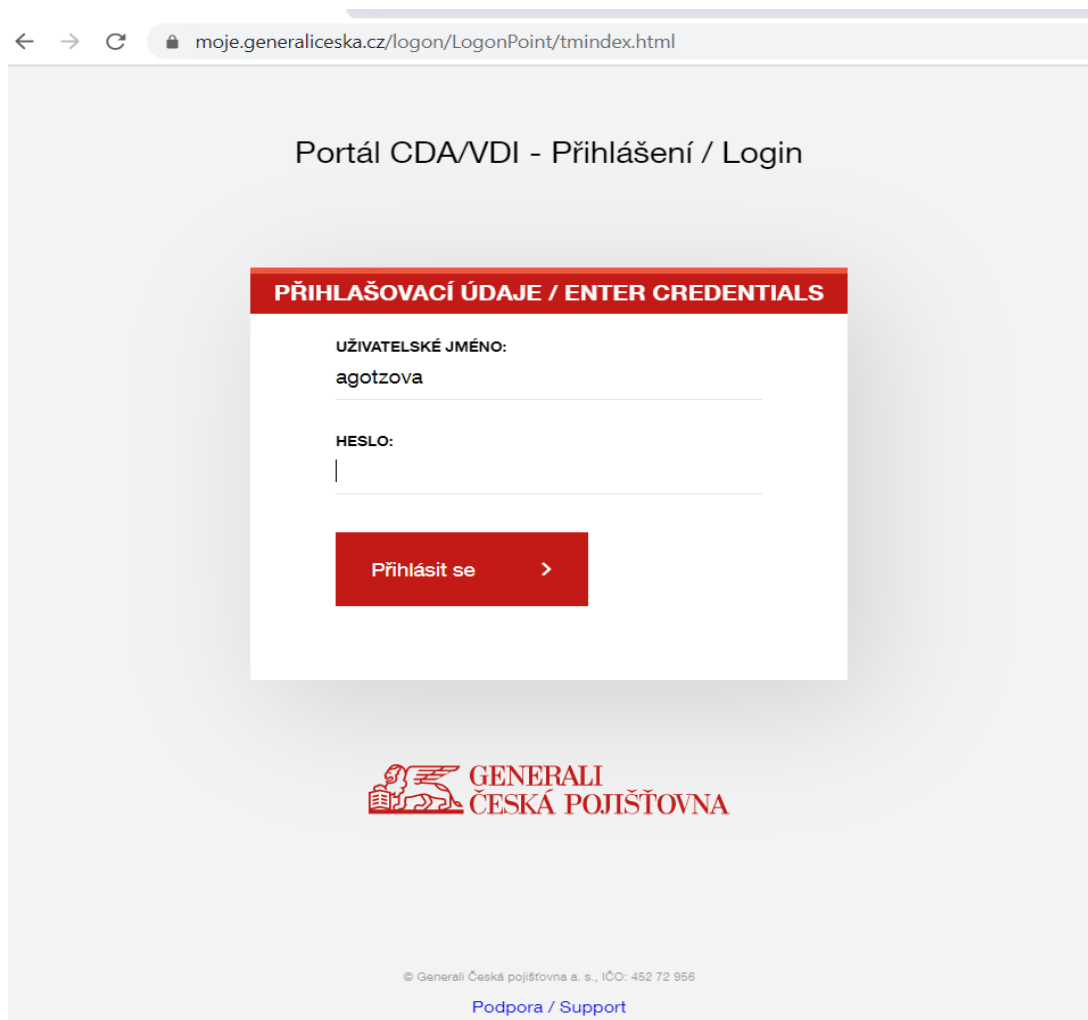

The screenshot shows a web browser window with the URL `moje.generaliceska.cz/logon/LogonPoint/tmindex.html`. The page title is "Portál CDA/VDI - Přihlášení / Login". The main content area displays a message: "CHALLENGE CODE: 68409727" with an information icon, followed by the instruction "VLOŽTE VYGENEROVANÝ OTP KÓD" (Insert generated OTP code). Below this is a red button labeled "Odeslat" (Send) with a right-pointing arrow. At the bottom of the page, the Generali Česká pojišťovna logo and name are visible, along with the copyright notice "© Generali Česká pojišťovna a. s., IČO: 452 72 966" and a link for "Podpora / Support".

Overlaid on the bottom right is a "OneTimePass" window. It has a menu bar with "Soubor", "Okno", and "?". The title bar includes the OneTimePass icon and the Generali Česká pojišťovna logo. The window contains a red key icon, a small graphic of a device with a masked input field, and the text "Zadejte CHALLENGE:" followed by an empty input field. At the bottom of the window, it says "Nyní používáte ID: JIMarek@cpas.cz".

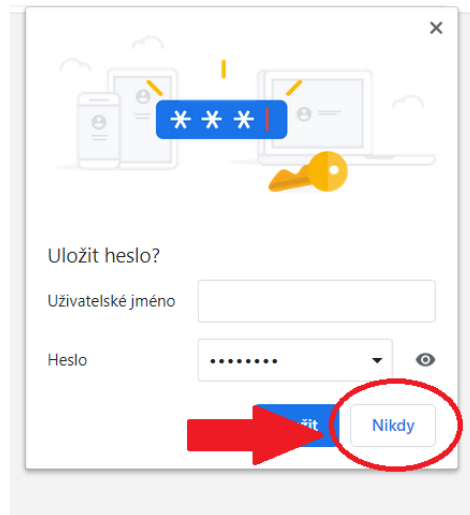

Enter your **OTP code**, you can use the **CTRL+V** buttons.

Enter your domain password.

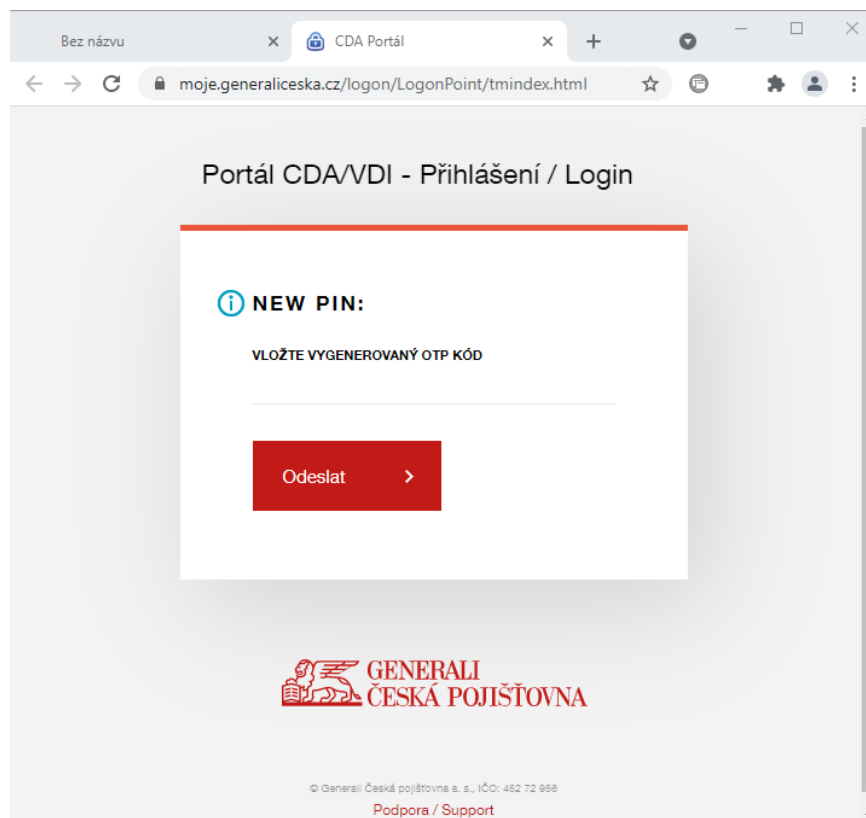

Never save your passwords.

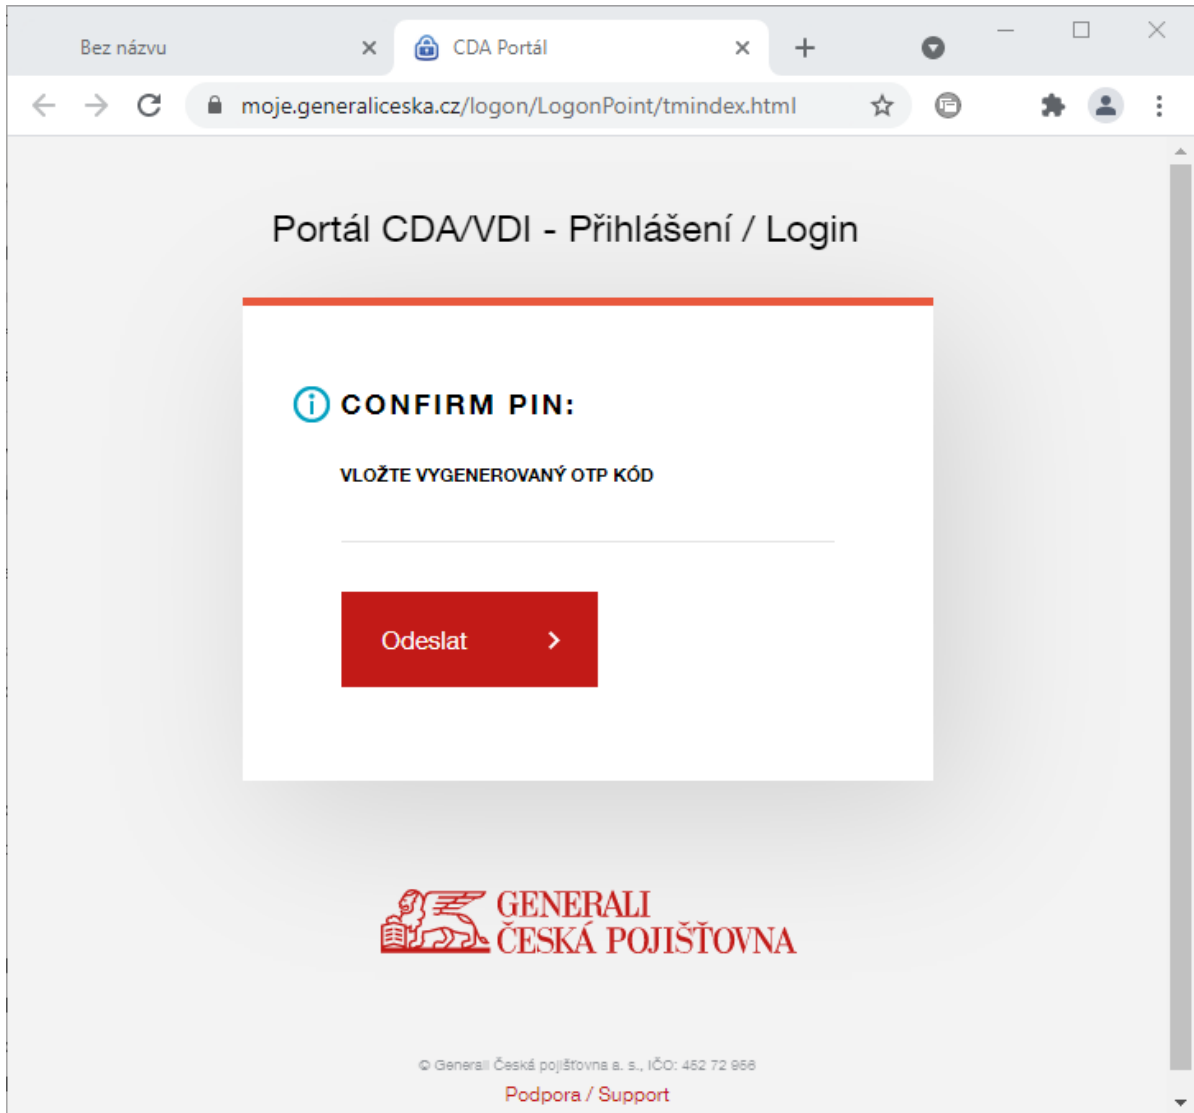

After entering the domain password the prompt „**NEW PIN:**“ is displayed. The system is required to enter a new PIN, which must be **exactly 6 characters**. If you enter a longer PIN, the access will be revoked.

The PIN can contain lowercase, uppercase letters, numbers, or a combination of both.

Enter new PIN again.

[Podpora / Support](#)

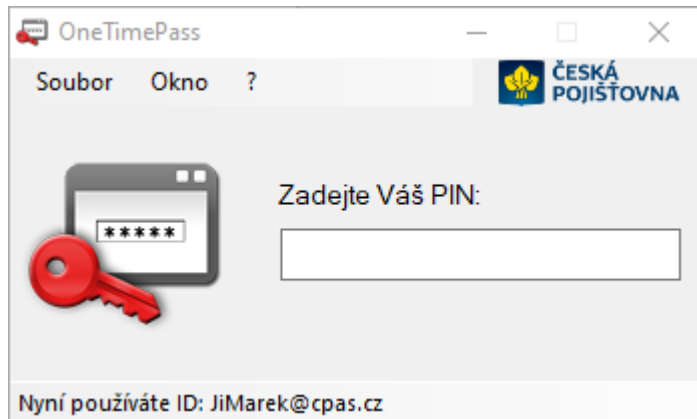

You will be prompted to log in again, where you are required to enter your username again.

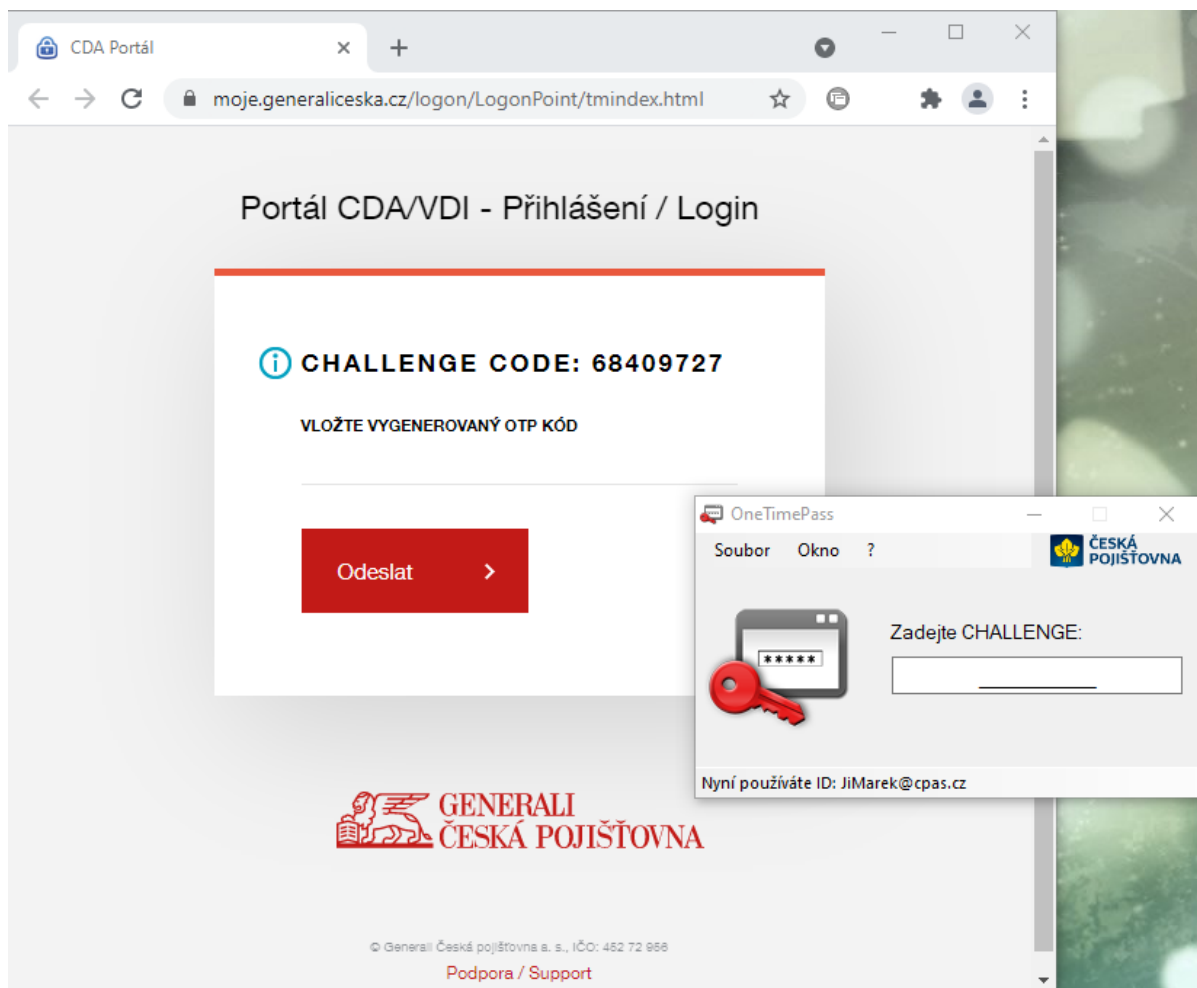

After entering it, you also need to log in again with a new PIN to OneTimePass, and this is done by closing the existing OneTimePass window with a cross in the upper right and restarting it, or by clicking the Reset button, see the picture.

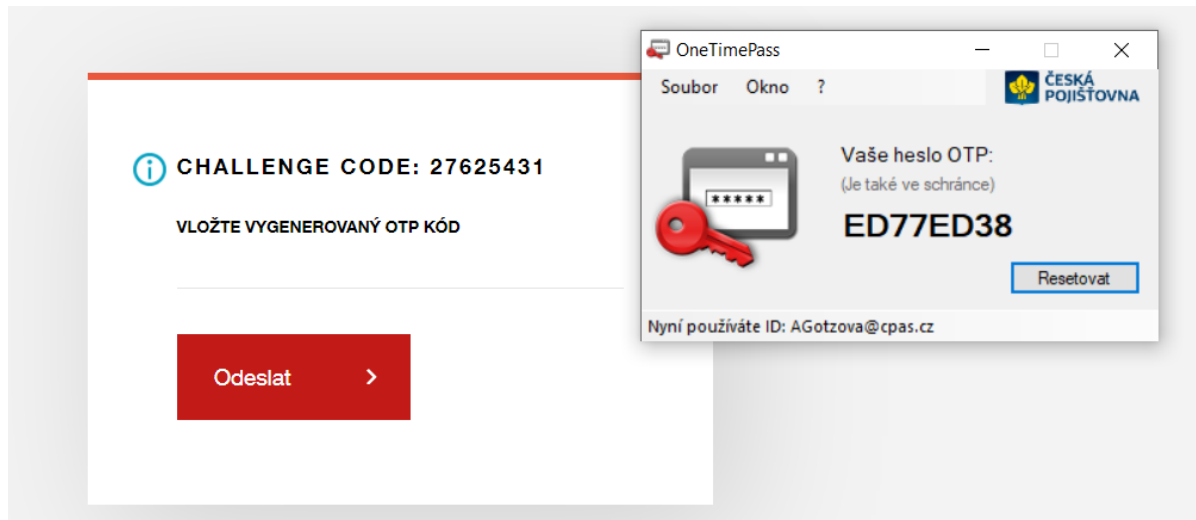

Enter new PIN.

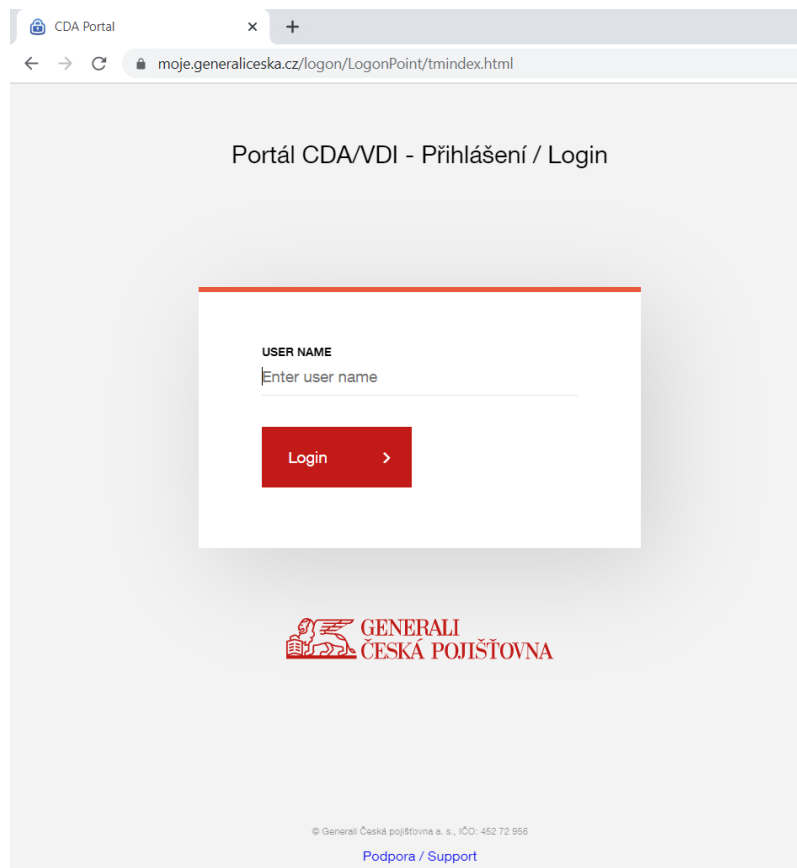

Enter **CHALLENGE** code. CAUTION, the code must be overwritten manually.

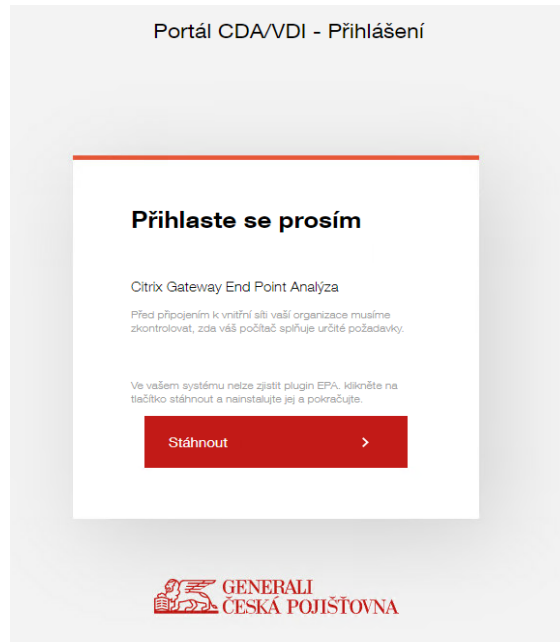

Enter your **OTP code**, you can use the **CTRL+V** buttons.

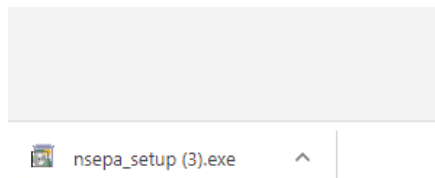

Enter your domain password.

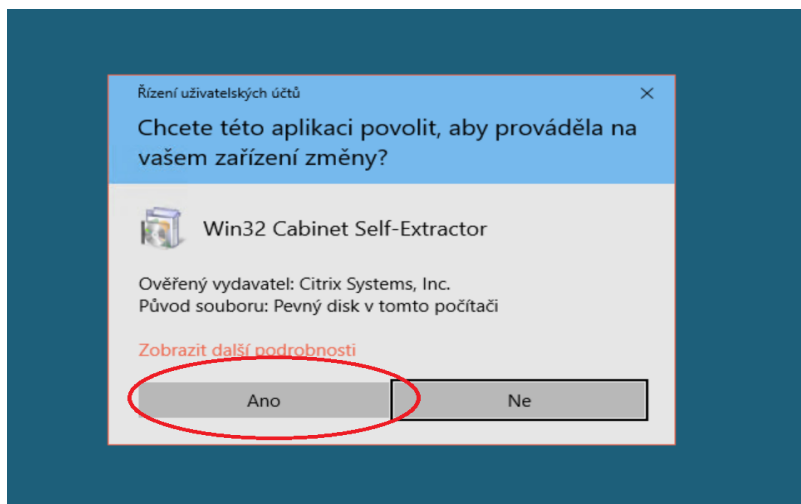

Upon your first login, you will be prompted to download the **EPA** (Citrix Gateway End Point Analysis) identification plugin. Click the **Download** button. During your subsequent logins at this location, wait for the automatic countdown and portal loading completion.

The downloaded plugin will appear in the bottom bar of your browser as an **.exe** file. Click on it.

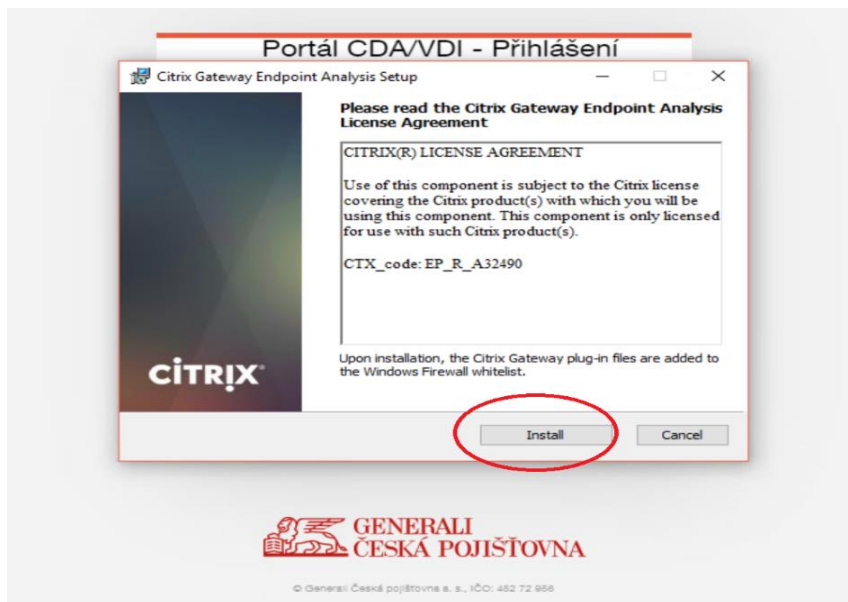

Enter **Yes**, and allow the application to make changes to your device.

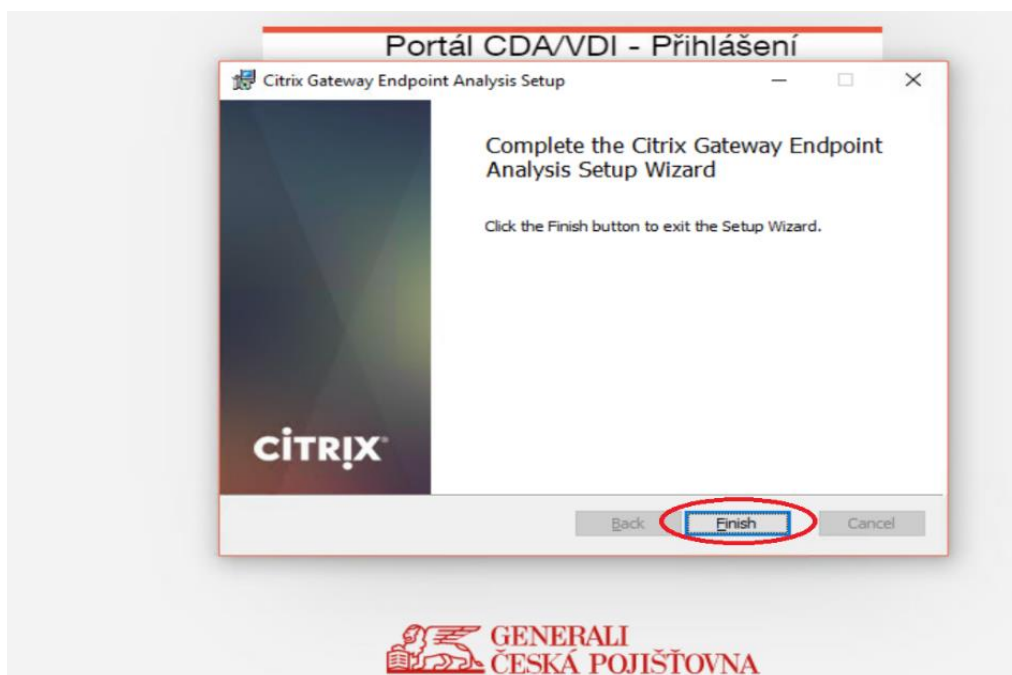

Note: Only users with local administrator rights may complete the installation.

Press the **Install** button. Let the installation complete.

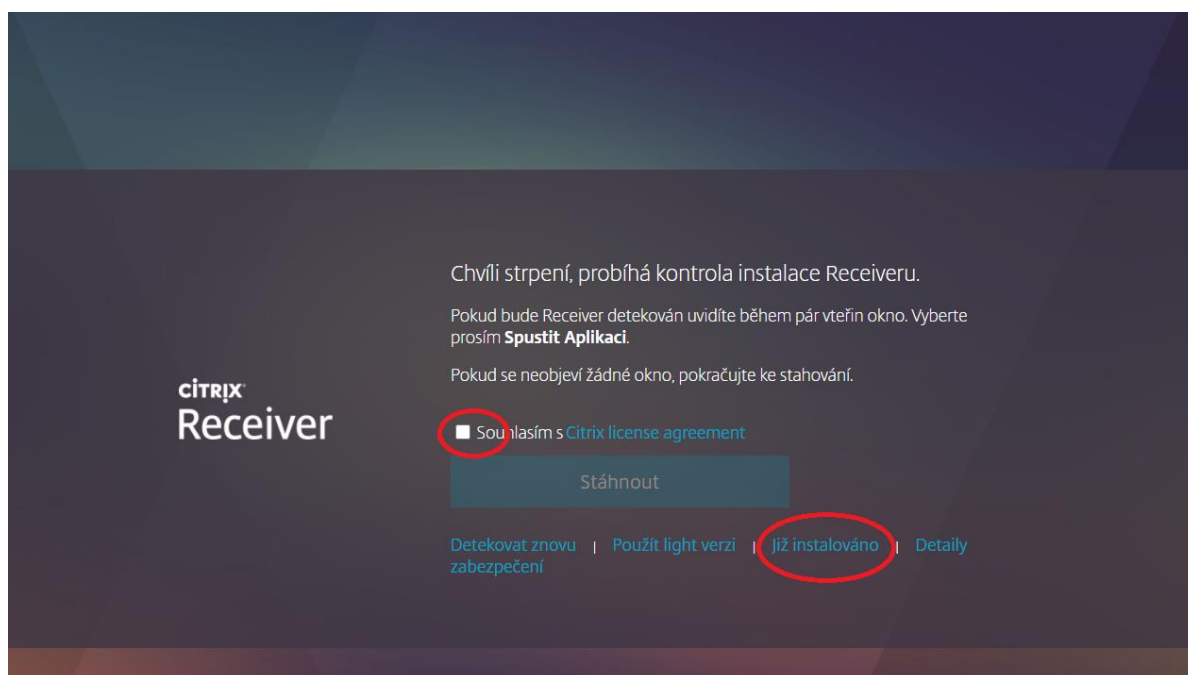

Click on **Finish** to finish the installation.

Wait while loading.

To run the CDA portal in its full version (so-called “thick client”) uncheck **I agree with the Citrix license agreement (Souhlasím s Citrix license agreement)**, agreement with the license terms, and the **Already installed (Již instalováno)** option.

To launch the CDA desktop, click on the selected desktop - Open - open the downloaded .ica file.
